

Defensive 50 Equities Trust

Series 5

A 15 Month Unit Investment Trust

Investment Objective

The trust seeks to provide total return potential in an environment where the stock market may experience a pullback in prices during the life of the trust. Total return may include capital appreciation and dividend income. There is no guarantee that the investment objective of the trust will be achieved.

Market Study

TIME HORIZON	December 31, 1990 – September 30, 2015
INCREMENTAL TIME PERIOD	Calendar Month
INVESTMENT UNIVERSE	S&P 500 Index
OBJECTIVE	Identify market "pullbacks", i.e. month declines in stock valuation between 5-10%

Portfolio Construction

- Identify stocks that outperformed the S&P 500 Index by 5% or more during the majority of the historical pullbacks
- Consider stocks that have positive historical annualized total returns, potentially showing strong performance coming out of pullbacks
- Consider stocks that pay a dividend and have a 2-year beta of less than 1.00
- Construct the final portfolio with 50 equally weighted stock that most closely meet the selection process criteria

More detailed information about the security selection process can be found in the trust's prospectus.

¹Distributions, if any, will be made commencing on November 25, 2015. The estimated net annual distribution is expected to decline over time because a portion of the securities included in the portfolio will be sold to pay for organization costs, creation and development fee and deferred sales charge. Distributions will fluctuate as a result of unitholder redemptions in addition to securities being sold within the portfolio. Distributions are also subject to the ability of issuers to make dividend payments in the future.

²Estimated Net Annual First Year Distribution per unit is computed by dividing the estimated annual income of the underlying securities less the expense per unit by the number of units outstanding. The estimated net annual distributions for subsequent years are expected to be less than estimated distributions for the first year because a portion of the securities included in the trust portfolio will be sold during the first year to pay for organization costs, the creation and development fee and the deferred sales charge. The actual net annual distributions will vary with changes in the trust's fees and expenses and income of the underlying securities.

Sales Charges⁴ (based on a \$10 public offering price)

Standard Accounts

Transactional Sales Charge:	Initial	1.00%
	Deferred	1.45%
Creation & Development Fee ⁴ :		0.50%
Maximum Sales Charge:		2.95%

The deferred sales charge is a charge of \$0.145 per unit and will be deducted in three monthly installments commencing on January 20, 2016. The initial and deferred sales fees do not apply to fee-based accounts. Please see the prospectus for sales charge details.

Fee/Wrap Accounts

Creation & Development Fee ⁵ :	\$0.05
Maximum Sales Charge:	\$0.05

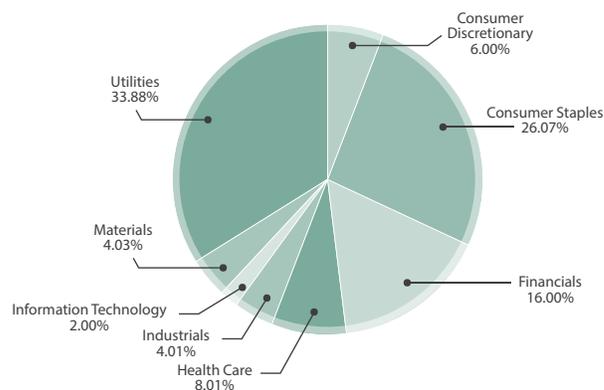

⁴Percentages are based on a \$10.00 per unit offering price. For unit prices other than \$10.00, percentages of initial sales charge, creation and development fee, and deferred sales charges will vary. Early redemption will still cause payment of the deferred sales charge. The table above shows the initial offering period sales charges only.

⁵The creation and development fee is a charge of \$.050 per unit collected at the end of the initial offering period. If the price you pay exceeds \$10 per unit, the creation and development fee will be less than 0.50%; if the price you pay is less than \$10 per unit, the creation and development fee will exceed 0.50%. In addition to the sales charges listed, UITs are subject to annual operating expenses and organization costs.

Risk Considerations

Unitholders can lose money by investing in this trust. An investment in units of the trust should be made with an understanding of the risks related to the trust, such as the following:

- Security prices will fluctuate. The value of your investment may fall over time.
- The financial condition of an issuer may worsen or its credit ratings may drop, resulting in a reduction in the value of your units. This may occur at any point in time, including during the initial offering period. Securities selected by the sponsor may not perform as expected during a “pullback.”
- The issuer of a security may be unwilling or unable to declare dividends in the future or may reduce the level of dividends declared. This may reduce the level of distributions the trust pays which could reduce your income and cause the value of your units to fall.
- The trust is not actively managed. Except in limited circumstances, the trust will hold, and continue to buy, shares of the same securities even if their market value declines.
- The sponsor may offer successive trusts with similar portfolios thereby allowing the investor to pursue the same strategy over a number of years. Investors should consider their ability to pursue investing in successive trusts, if available. There may be tax consequences associated with investing in the trust and rolling over an investment from one trust to the next.
- The trust is considered to be concentrated in securities issued by companies in the consumer products and services and utilities sectors. Negative developments in these sectors will affect the value of your investment more than would be the case in a more diversified investment.
