

Morningstar Dividend Yield Select Trust

Series 1

A 2 Year Unit Investment Trust

Investment Objective

The trust seeks to maximize total return potential through capital appreciation and current dividend income. There is no guarantee that the investment objective of the trust will be achieved.

Investment Strategy

The trust seeks to pursue its objective by investing in a portfolio consisting of the equity securities of the companies comprising the Morningstar[®] US Dividend Yield Focus 50 Equal Weight IndexSM.

The objective of the Index is to track high-yielding, dividend-paying, U.S.-based securities. The Index is a subset of the Morningstar[®] US Market Index, a broad market index representing 97% of U.S. equity market capitalization. The Index is a focused benchmark comprising “qualified income” paying securities screened for superior company quality and financial health. The Index represents the top 50 yielding stocks meeting the screening requirements.

Volume Discounts

PURCHASE AMOUNT ³	SALES CHARGE
Less than \$50,000	3.95%
\$50,000 but less than \$100,000	3.70%
\$100,000 but less than \$250,000	3.45%
\$250,000 but less than \$500,000	3.10%
\$500,000 but less than \$1,000,000	2.95%
\$1,000,000 or greater	2.45%

¹Distributions, if any, will be made commencing on April 25, 2017. The estimated net annual distribution is expected to decline over time because a portion of the securities included in the portfolio will be sold to pay for organization costs, creation and development fee and deferred sales charge. Distributions will fluctuate as a result of unitholder redemptions in addition to securities being sold within the portfolio. Distributions are also subject to the ability of issuers to make dividend payments in the future.

²Estimated Net Annual First Year Distribution per unit is computed by dividing the estimated annual income of the underlying securities less the expense per unit by the number of units outstanding. The estimated net annual distributions for subsequent years are expected to be less than estimated distributions for the first year because a portion of the securities included in the trust portfolio will be sold during the first year to pay for organization costs, the creation and development fee and the deferred sales charge. The actual net annual distributions will vary with changes in the trust's fees and expenses and income of the underlying securities.

³The volume discount is also applied on a unit basis utilizing a breakpoint equivalent in the above table of one unit per \$10. Please see the trust prospectus for full details. These discounts are only offered during the initial offering period.

⁴Percentages are based on a \$10.00 per unit offering price. For unit prices other than \$10.00, percentages of initial sales charge, creation and development fee, and deferred sales charges will vary. Early redemption will still cause payment of the deferred sales charge. The table above shows the initial offering period sales charges only.

⁵The creation and development fee is a charge of \$.050 per unit collected at the end of the initial offering period. If the price you pay exceeds \$10 per unit, the creation and development fee will be less than 0.50%; if the price you pay is less than \$10 per unit, the creation and development fee will exceed 0.50%. In addition to the sales charges listed, UITs are subject to annual operating expenses and organization costs.

Risk Considerations

Unitholders can lose money by investing in this trust. An investment in units of the trust should be made with an understanding of the risks related to the trust, such as the following:

- Security prices will fluctuate. The value of your investment may fall over time.
- The financial condition of an issuer may worsen or its credit ratings may drop, resulting in a reduction in the value of your units. This may occur at any point in time, including during the initial offering period.
- The issuer of a security may be unwilling or unable to declare dividends in the future or may reduce the level of dividends declared. This may reduce the level of distributions the trust pays which could reduce your income and cause the value of your units to fall.
- The trust is considered to be concentrated in securities issued by companies in the utilities sector. Negative developments in this sector will affect the value of your investment more than would be the case in a more diversified investment.
- The trust invests in securities from the Index selected prior to the date of the trust's formation. The securities in the trust's portfolio will not change if the Index components, or their weightings within the Index, change. The performance of the trust may not correspond with the Index for this reason and because the trust incurs a sales charge and expenses.
- The trust is not actively managed. Except in limited circumstances, the trust will hold, and continue to buy, shares of the same securities even if their market value declines.
- The sponsor may offer successive Trusts with similar portfolios thereby allowing the investor to pursue the same strategy over a number of years. Investors should consider their ability to pursue investing in successive Trusts, if available. There may be tax consequences associated with investing in the Trust and rolling over an investment from one Trust to the next.
